

## INSTALLATION, CARE AND MAINTENANCE MANUAL

# ISOTHERMAL COVERINGS

## BUBBLES & MOUSSE

### Precautions and precautions

- Use this product exclusively for the purpose for which it is intended, any other use other than covering the pool of water can be dangerous for users and for the product itself: this condition therefore invalidates the warranty conditions and excludes any responsibility of the producer;
- the cover cannot support the weight of people, animals or other heavy bodies. It is therefore advisable to enclose the area to ensure the safety of people and animals;
- when the product is installed, never leave children near the pool without adult supervision;
- during the operations of unrolling / laying the cover in the tank or its removal, it is recommended to avoid rubbing against sharp surfaces or sharp edges which could damage the product, invalidating the warranty conditions;
- do not use cleaning products that are aggressive or unsuitable for the type of material<sup>1</sup> or any type of solvent;
- avoid exposure to heat sources;
- do not leave the roof exposed to direct sunlight for prolonged periods.

### Installation

Before laying the cover sheet it is advisable to remove any foreign bodies floating on the free surface of the pool water. Then carry out the following operations:

- unroll the cover by taking it from the edge of the shorter side and spread it over the pool's water surface. For isothermal bubble covers, make sure that they are in contact with water;
- if you have a reel, join the clamps to the rewinder axis following the instructions in the manual of the same.

### Maintenance and storage

For wintering, remove the cover, after washing it with water and neutral soap and letting it dry completely flat, to avoid areas of water stagnation.

Roll it up carefully and put it back in the storage bag. Store it in an environment not exposed to sun and bad weather, avoiding subjecting it to the weight of other objects.

### Warranty of the product

Isothermal pool covers, bubbles and mousses, are guaranteed for any original defect (material or production) for a period of 2 years from the date of purchase.

The warranty period does not extend or renew following product repairs or replacements. The warranty does not cover:

- any damage due to improper use or inadequate maintenance, as well as failure to comply with the instructions provided in this manual;
- damage due to normal wear / aging of the product;
- damage due to causes not directly attributable to the manufacturer. In particular, if the product has been modified by unauthorized third parties and / or if one or more parts are found to be non-original, any warranty is void

The verification of the existence of the defect is by the manufacturer, who reserves the decision to carry out analyzes on the basis of the requested data (photos, purchase documents, analysis of the tank water, return of the product) and to provide a solution proportionate to the actual defect and condition of the product.

C.P.A. srl reserves the right to change, in whole or in part, the characteristics of the products and the content of this document without prior notice. It is the customer's responsibility to ensure that the purchased product is suitable for the intended use.
