

EPS BLOK è il nuovo sistema di cassetta isoterma pre-formata in moduli dritti e già curvati, facile e veloce per il getto di piscine in calcestruzzo. EPS BLOK grazie alla sua leggerezza ed i suoi incastri che lo rendono impilabile permette un facile trasporto e inoltre ha:

- proprietà isoterme che permettono di mantenere più a lungo la temperatura raggiunta dall'acqua
- maggiore semplicità nell'assemblare le pareti curve
- stampa in polistirene alta densità per pareti diritte e precurvate
- getto di calcestruzzo dosaggio fine densità C25/30

EPS BLOK is the new isothermal formwork in rectangular and curved form, easy and fast for building concrete pools. EPS BLOK thanks to its lightness and its joints that make it stackable allows easy transport and also has:

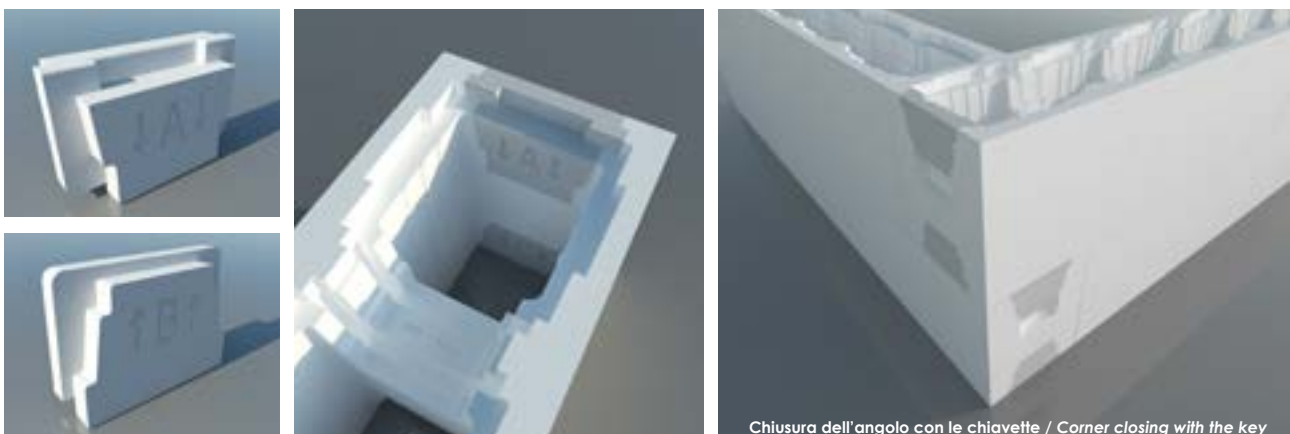

- *isotherm properties that allow the pool to keep the water temperature*
- *greater simplicity in assembling curved walls*
- *molding high-density polystyrene for straight walls and pre-curved*
- *concrete batching end density C25/30*
